NEWS from the President – posted July, 2009

WOW... what a fantastic field trip several TESTA members took June 13-22 to Iceland. From hiking on glaciers to floating with icebergs while we tasted 800-year-old ice, we enjoyed exploring many facets of this wonderful island.

Follow this [link](#) to read more details, and please visit our booths, 1700 & 1702, at CAST to see our PowerPoint presentation of our travels. We have samples of Icelandic rock for our rock raffle as well as our luncheon.

Speaking of CAST! This year, we will present 3 field trips, 4 short courses, 4 workshops, our share-a-thon, and our famous rock raffle. Our luncheon features Dr. Alison Henning, Rice University, presenting "Evolution in Science and Society."

TESTA will be celebrating our 25th anniversary. Follow this [link](#) to find more ways you can help us make this year at CAST our best yet.

Contact me for more information about any of our activities. See you there!
